

WOODTEST-LED PRO 20 – 365 nm

UV LAMP 365 LED

Art. 78173/F20

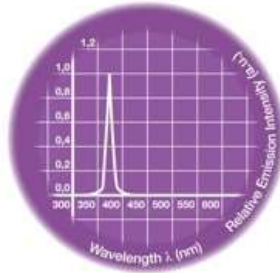

UV LAMP 365 LED, High-power lamp with filter for professional WOOD light examinations; can be used on paintings, documents, etc.

Product Description:

The WOOD-LED PRO is an innovative device developed for UV fluorescence analyses on the surfaces of objects and materials during restoration, as well as for historical-artistic technical examinations. The lamp features a durable anodized aluminum body and emits radiation with high-efficiency UV LEDs. It is also equipped with an optical filter that blocks light components outside 365 nm, which could otherwise mask the weak luminescence of certain pigments.

Technical Specifications:

- Filter: UV
- Power consumption: 20 W
- Wavelength: 365 nm
- Material: Aluminum
- Battery: Lithium
- Charger: USB input
- Dimensions: 152 x Ø 4

Professional use
